

Quality Policy

ALSHOALA ENGINEERING COMPANY is a Libyan company, providing a range of consulting, engineering, project management, maintenance services, and training and implementation services to industrial clients in the automation field.

With many years in business, ALSHOALA individuals have gained extensive real-world experience of control systems projects in many industries, developing core competencies in the food and beverage, glass, chemical, metals, cement, water treatment, water production, oil, gas, paper and other industries.

At the same time giving prime consideration to safety, reliability, operability and environmental requirements to ensure our customers complete satisfaction with the product supplied by us.

In order to promote and accomplish this we have implemented quality management system complying with ISO 9001.

Our Management commits itself to reach goals in implementing the following rules to the Quality Policy:

- Identify and satisfy the customer's needs to establish our Company as a dependable supplier
- It is understood that we comply with all applicable contractual and legal requirements
- While providing a valuable service to meet delivery and handover requirements we give due consideration to cost aspects
- We ensure that our quality assurance measures are also implemented and enforced to our vendors and subcontractors, to reach and maintain the overall quality level required for our products
- Our personnel is trained, informed and briefed to maintain its skills on the level of standards required to fulfil their work
- Each and every employee is responsible for the quality of his/her own work
- We frequently analyse our process measures to continually improve our products and services.

ALSHOALA shall be entirely responsible for the quality of work produced, including that produced by its employees, suppliers and subcontractors.
